

ABSTRACT OF THE DISCLOSURE

5 A notebook computer with hidden multimedia
controller. The notebook computer has a cavity and a
multimedia device. A multimedia controller with a
10 plurality of keys to control the multimedia device
movably pivoted to the main body. The notebook computer
has a switch with a rod. Two magnets are individually
disposed on the rod and the multimedia controller. The
multimedia controller is attracted, remaining in the
cavity. When the switch is pressed, the multimedia
controller is pushed out from the cavity by the repulsive
magnetic force.
